SUMMARY

A Data enthusiast, committed to leverage my skills in data analytics and problem-solving to drive insights. With a background in Information Systems, complemented by hands-on projects and relevant certifications such as Python, Excel, SQL, and Tableau, I am actively shaping my expertise in the data field. Additionally, my experience in leadership roles has honed my teamwork and project management skills within collaborative environments. I am determined to contribute to organizations in roles encompassing data analytics, data engineering, data science, and business intelligence.
